6387588105 ◇ B.Tech(ECE),JMI, Delhi

[phahamkhan17@gmail.com](mailto:phahamkhan17@gmail.com) ◇ [LeetCode profile](#) ◇ [Github Profile](#)

## PROFILE

---

I am a third year student of Electronics and I'm a MERN stack web developer with problem-solving skills. I'm pretty good in backend part though.

## EDUCATION

---

**B.Tech(ECE)**, Jamia Millia Islamia

Expected 2024

Overall GPA(Till 5th sem): 9.56

**XIIth**, Pt. D. D. U. S. V. M. Inter College, CBSE Board

2018 - 2019

Percentage: 91.8

## SKILLS

---

**Programming Languages:** HTML, CSS, JavaScript, C++

**Frameworks/Libraries:** Node.js, Express.js, React.js, Bootstrap, SCSS

**Databases:** MongoDB, MySQL

**Tools:** Git, Github, VS Code, Heroku, Vercel

**Other:** REST APIs

## COURSEWORK

---

**Data Structures and Algorithms**  
**System Design**

**Operating System**  
**DBMS (MySQL)**

## EXPERIENCE

---

**Intern**

April 2021 - July 2021

Coding Ninjas

- Coding Ninjas is a startup which provides various types of tech(programming and development) related courses.

**Backend Developer**

May 2022 - July 2022

Genesis Technologies

- Genesis Technologies, Inc. provides office equipment and software solutions
- My main field is on debugging and resolving bugs in the code so I learned much more about debugging

## PROJECTS

---

**BoogieBites (Food Ordering and Recipe app)** A food ordering app with a REST API using MongoDB, Mongoose, Express and Stripe. It consists of features like user signup/login, consists of 72 dishes from around the world and 12 diverse categories, cart functionality, Order functionality even it comes with a chat feature. ([Live Demo](#))

**TripHive (Tour Booking site)** Built a full-stack web application that allows users to book tours, search for tour packages, and read reviews of various tours. Utilized pug for the front-end, Node.js/Express.js for the back-end, and MongoDB as the database. Implemented payment gateway integration using Stripe API. ([Live Demo](#))

**Quiz App** Designed a trivia quiz application that allows users to select a category and difficulty level to test their knowledge. Used ReactJs for the front-end and integrated the Open Trivia API for quiz data. ([Live Demo](#))
